FLEET GOLD® KIT # RMT14001

VOLTAGE SENSING/TIMER CONTROL CIRCUIT

INVERTER REMOTE TYPE: ONE WIRE 12v POSITIVE INPUT

FLEET GOLD® KIT # RMT14001 INCLUDES THE FOLLOWING ITEMS:

VOLTAGE SENSING/TIMER CONTROL CIRCUIT IN-LINE FUSE & HOLDER	PARTS LIST WIRING DIAGRAM
--	------------------------------

CIRCUIT DESCRIPTION:

1. When the battery voltage is above 12.9 volts the voltage sensing module will turn on and feed 12v power to the inverter's remote circuit.
2. The inverter remote will turn the inverter on/off.
3. At the point the battery voltage drops to 12.7 volts the timer circuit turns on keeping the inverter remote circuit alive for one hour. If within the one hour the battery voltage drops below 11.9 volts the timer circuit will turn off, removing the voltage to the inverter remote switch.

The system will automatically reset when the battery voltage is raised to 12.9 volts or above.
