

FLEET GOLD® KIT # 005392

POWER POINT SOCKET KIT w/ VOLTAGE SENSING-TIMER CIRCUIT

Features:

- Voltage sensing / timer circuit. Prevents deep battery discharge.
- Two heavy duty power point sockets.
- One dual USB power point socket.
- 18' power harness.
- 15amp fuse kit.

CIRCUIT DESCRIPTION:

1. When the battery voltage is above 12.9 volts the three power sockets will turn on.
2. At the point the battery voltage drops to 12.7 volts the timer circuit turns on keeping the three power point sockets alive for one hour. If within the one hour the battery voltage drops below 11.9 volts the timer circuit will turn off, removing the voltage to the three power point sockets.

The system will automatically reset when the battery voltage is raised to 12.9 volts or above.
