

WHAT IS FLEET GOLD?

FLEET GOLD® is a new strategic partnership of specialized Mobile AC Power Installers. Fleet Electric, #1 in the Northeast for Mobile AC Power Systems for the telecommunication, utility, public authority and cable markets, is teaming up with other high quality installers to offer customers - **FLEET GOLD**® - a national network of trained specialists that sell, install and service power equipment in trucks, vans and other vehicles.

The program offers Mobile AC Power Systems at multiple sites using the same high quality standards. It affords you the opportunity to receive Fleet engineering services even if they're far from our northeastern base of operations.

FLEET GOLD® installers are chosen for their reputation, technical knowledge and skill in this specialized area. You will be assured of high standards of excellence that guarantee our products and services perform as specified.

WHY FLEET GOLD MEANS GREATER SAVINGS AND QUALITY: BEFORE, DURING AND AFTER INSTALLATION

BEFORE

The sales team at your **FLEET GOLD**® installer is trained to understand a variety of Mobile AC Power Systems and options.

The process begins by matching your needs and requirements, with the best and most cost-effective solution.

Technicians receive installation and basic service training to ensure consistent, quality installations with support after the sale.

Your **FLEET GOLD**® installer has the right product to fit your requirements and budget, offering a wide range of products including products from leading generator and inverter manufacturers.

DURING

Mobile AC Power Systems are custom engineered, assembled into kits, and shipped from Fleet Electric's facility located in Worcester, MA. These systems can offer value-added features like remote start/stop controls, engine throttle systems, custom faceplates and electrical outlet configurations, proper circuit breaker protection, compartments and exhaust systems. High output alternators, belt and pulley ratio selection and custom mounting brackets can be provided for some applications.

Installers are trained to complete each vehicle in the same way, with the same commitment to customer service and product performance.

AND AFTER

Each **FLEET GOLD**® system is backed by Fleet's experience supplying over 10,000 Mobile AC Power Systems plus a nationwide toll-free number for product support.

“While nobody wants to have a warranty problem, I rest a lot easier knowing it's Fleet standing behind the warranty”

Warranty support is provided by a combination of your **FLEET GOLD**® installer and Fleet Electric.
